CyclicRotation Submitted in: Java 8	10 min	100%

TASKS DETAILS

EASY	1. CyclicRotation Rotate an array to the right by a given number of steps.	Task Score	Correctness	Performance
			100%	100% Not assessed

Task description

An array A consisting of N integers is given. Rotation of the array means that each element is shifted right by one index, and the last element of the array is moved to the first place. For example, the rotation of array A = [3, 8, 9, 7, 6] is [6, 3, 8, 9, 7] (elements are shifted right by one index and 6 is moved to the first place).

The goal is to rotate array A K times; that is, each element of A will be shifted to the right K times.

Write a function:

```
class Solution { public int[] solution(int[] A, int K); }
```

that, given an array A consisting of N integers and an integer K, returns the array A rotated K times.

For example, given

```
A = [3, 8, 9, 7, 6]
K = 3
```

the function should return [9, 7, 6, 3, 8]. Three rotations were made:

```
[3, 8, 9, 7, 6] -> [6, 3, 8, 9, 7]
[6, 3, 8, 9, 7] -> [7, 6, 3, 8, 9]
[7, 6, 3, 8, 9] -> [9, 7, 6, 3, 8]
```

For another example, given

```
A = [0, 0, 0]
K = 1
```

the function should return [0, 0, 0]

Given

Solution

Programming language used:	Java 8	
Total time used:	10 minutes	?
Effective time used:	10 minutes	?
Notes:	not defined yet	

Task timeline

Code: 17:27:41 UTC, java, final, score: 100 [show code in pop-up](#)

```
1 // you can also use imports, for example:
2 // import java.util.*;
3
4 // you can write to stdout for debugging purposes, e.g.
5 // System.out.println("this is a debug message");
6
7 class Solution {
8     public static int[] solution(int[] a, int k) {
9         if (k == 0 || a.length == 0)
```

A = [1, 2, 3, 4]
K = 4

the function should return [1, 2, 3, 4]

Assume that:

- N and K are integers within the range [0..100];
 - each element of array A is an integer within the range [-1,000..1,000].
- In your solution, focus on **correctness**. The performance of your solution will not be the focus of the assessment.

Test results - Codility

```
10         return a;  
11  
12         k = k % a.length;  
13         int[] r = new int[a.length];  
14  
15         for (int i = a.length - k; i < a.length; i  
16             r[i - a.length + k] = a[i];  
17  
18         for (int i = 0; i < a.length - k; i++)  
19             r[i + k] = a[i];  
20  
21         return r;  
22     }  
23 }
```

Analysis summary

The solution obtained perfect score.

Analysis ?

expand all	Example tests
▶ example first example test	✓ OK
▶ example2 second example test	✓ OK
▶ example3 third example test	✓ OK
expand all	Correctness tests
▶ extreme_empty empty array	✓ OK
▶ single one element, 0 <= K <= 5	✓ OK
